

The FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections. Indiana's Telephone Privacy law has resulted in a much improved home environment for my family. Prior to enactment of Indiana's Telephone Privacy law, we received 10-15 calls per week, many during the evening meal. Now it is common not to receive any calls. I do not want UNSOLICITED telephone calls intruding upon my quality time at home. Do not decrease or delete the protection that Indiana's law is providing me.
